MSRP: \$29.95 US

[Download Product Sheet](#)

- On-screen controls
- Requires EQ-SICC-1
- Create own GUI

ErgoQuest™ On-Screen Keypad Interface (EQ-OSKI-1) puts the function of the keypad control on the computer screen. Allows users to control the table height and monitor tilt on screen. Different handset types can be set depending on the motor-control used. The software can be operated with a mouse and/or keyboard. Users can create their own graphical user interface. Requires the EQ-SICC-1 to function.
