- Motorized movement
- 360 degree movement
- Rechargeable Batteries
- Custom fit to each ZGR
- Toggle switch control

The ErgoQuest PC-6LM Zero-Gravity Recliner (EQ-PC-6LM) (Manufactured by Interactive Health) combined with the Motorized Mobile Recliner Platform (MMRP-1) gives motorized mobility to the EQ-PC-6L zero-gravity recliner. The platform is custom-sized to fit the PC-6 and offers powered movement through a full 360 degrees, a joystick control interface, and rechargeable batteries. The platform is independent of the chair; the recliner simply rests in place on the platform and can be removed from the platform at any time. The platform lifts the chair about 2" above the floor.
